

Emergency Asthma Management (EAM)

Course Overview

The course in Emergency Asthma Management (EAM) is an accredited training course specifically designed to:

- promote the standardized emergency management protocols for treating an asthma attack
- raise the general level of awareness of asthma and emergency asthma management
- promote a proactive approach to asthma through the development of an asthma policy
- provide a registration protocol, which enables access to blue reliever medication for first aid purposes to be held in first aid kits

Why undertake this course?

- to ensure somebody knows what to do in case of an emergency
- to provide the means to enable an organisation to hold blue reliever medication for first aid purposes in a first aid kit according to current regulations

Date(s)	Please refer to www.msac institute.com.au
